GRADE TRACKER

Each time a grade for an item is received, list what the item was, points received, and how many points were possible for that item. An approximate grade in the course at any point in time can calculated as follows:

Add up the Points Received to date and the Points Possible to date.

Total Points Received ÷ Total Points Possible = % Grade ***(Example: 85 pts. received ÷ 110 pts. possible = 77%)***
In general, 90% > = 4.0 80-89% = 3.0-3.5 70-79% = 2.0-2.5 60-69% = 1.0-1.5 59% and below = 0.0
The point scale and % scale may vary by course. Check your course syllabuses for the grading scale being used for each course.

Course:

Graded Item (Homework, Quiz, Report, Exam, etc.)	Points Received	Points Possible

Course:

Graded Item (Homework, Quiz, Report, Exam, etc.)	Points Received	Points Possible

Course:

Graded Item (Homework, Quiz, Report, Exam, etc.)	Points Received	Points Possible

Course:

Graded Item (Homework, Quiz, Report, Exam, etc.)	Points Received	Points Possible
