Diverse Student Populations and Identity Development: Strategies for Student Success

Abstract
In the ever-changing world of the 21st Century, and smaller global communities, it is more important than ever to share experiences and collaborate on a broader scale for the good of our students. To do this, one must be cognizant of cultural differences and socioeconomic backgrounds. Working with a first generation student or an exploring one can be very challenging. The same could be said when only working with honors students. This workshop will provide insights on all diverse student populations and provide strategies to ensure success.

Outcomes:
- Discuss identity issues and how to work best with them
- Learn more about their own cultural competencies
- Discuss strategies for working with all types of student populations
