A Collection of Retention Quotes Related to Advising
Retention Quotes

1) "By capitalizing on the benefits of quality advising, colleges can more effectively help students select the programs and courses that will help them stay in school and on track toward achievement of their education and career goals."

2) "An effective advising program is one prime factor in increasing student retention. Academic advising assists students in many ways, and each campus must make a concerted effort to develop a strategy to retain students. Students who receive effective academic advising tend to feel positive about the institution as a whole (Noel, 1978)."

3) "Academic advising is the only structured service on the campus in which all students have the opportunity for on-going, one-to-one contact with a concerned representative of the institution."

4) "Advising is a key to student retention. The best way to keep students enrolled is to keep them stimulated, challenged and progressing toward a meaningful goal. The best way to do that--especially among new students--is through informed academic advising."

Anderson, Edward 'Chip'. (1997). _Academic Advising for Student Success and Retention._ Noel-Levitz, Iowa City, IA.

5) "Good advising may be the single most underestimated characteristic of a successful college experience."

6) "If students are to succeed in college and in life, the principles of developmental advising must be considered essential to all phases of the institution. "Advising cannot be done in isolation. This process must be integrated among all constituents of the institution" (Grites, 1979, p. 6). Advisors are in a unique position to champion and monitor this integration."

Original Quote: Grites, T. (1979). _Academic advising: Getting Us through the Eighties._ In D. Crockett (Ed.) Advising skills, techniques, and resources: A compilation of materials related to the organization and delivery of advising services (pp. 5-7). Iowa City, IA: ACT.

7) Beal and Noel (1980), reporting on a joint project of the American College Testing Program and the National Center for Higher Education Management Systems, identified 'inadequate academic
advising' as the greatest impediment to student retention. From a positive perspective, a 'caring attitude of faculty and staff' was the strongest positive correlate with persistence.

Forrest (1982) points to the efficacy of academic advising for achieving general education objectives and increasing student persistence: 'the single most important move an institution can make to increase student persistence to graduation is to ensure that students receive the guidance they need at the beginning of the journey through college.'

An analysis of available data from a pre-SAC ESU student cohort and the SAC-influenced cohort suggests that the four-year retention rate has been increased by 8.0 percentage points. Because no discernible treatment variable exists other than the presence of a centralized student advising service which practices intrusive advising, one may conclude that the services of the Student Advising Center have measurably affected the persistence of students at Emporia State University. The salient finding of this analysis corroborates the retention literature, and suggests one strategy which institutions might pursue to increase the retention of matriculants.

8) 'Advising's place in the national debate in retention began with Beal and Noel's 1979 publication What Works in Student Retention, which reported that poor advising was a significant reason for learning college, and a significant relationship with someone at school was found to be most important in retention. While institutional integration has since been more broadly defined to address both social and academic connections with the college (Tinto, 1990), the presumptive link between advising and retention remains. Greater faculty-student contact and sound academic advising have been seen as the core of campus retention efforts (for example, Beasley-Fielstein, 1986; Clark, 1989). However, the vast majority of subsequent studies have used wither single-institution samples, small samples, or both, critically masking institution differences in the impact of faculty on retention (Terenzini and other, 1981). Since 1979, only one study has contradicted the conclusion that correlations between improved advising services and retention are causative (Mark and Romano, 1982).'

9) In an address to the 1988 NACADA Convention, Dr. Vincent Tinto of Syracuse University stressed that 'all effective retention programs have effective advising at their very core.' Tinto maintained that effective advising programs had to be the core of any institutional efforts at the education and retention of students. He placed great emphasis on the need for frequent and rewarding contact between faculty, staff, and students outside the formal confines of the classroom.

10) "A major factor in increasing student retention rates is the establishment of advising systems which take into account the developmental and academic needs of the students as well as career counseling."

11) "How then should we restructure the first year of college? What would be the distinguishing characteristics that would best promote student persistence? Second, academic advising should be an integral part of the first-year experience, not an adjunct to it. Advising should be woven into the fabric of the freshman year in ways that promote student development and that provide clear, consistent, and accurate information that is easily accessible to students. It should reflect the best professional knowledge of the day. Quite simply, good advising should not be left to chance."

12) "Frequent faculty-student contact in and out of the classroom is the most important factor in student motivation and involvement."

13) "Frequent interaction with faculty related more strongly to satisfaction than any other type of involvement or characteristic of the student or the institution."

14) "Academic advisors mediate the dissonance between what students expect from the educational environment and what they experience in that environment."

15) "Effective retention programs have come to understand that academic advising is the very core of successful institutional efforts to educate and retain students."

16) "The cost of recruiting one new student to college approximates the cost of retaining 3-5 already enrolled students."

17) "The 2002 National Survey of Student Engagement (NSSE) data reveal that students reporting the highest degree of satisfaction with the quality of their academic advisement were most likely to demonstrate the highest levels of student engagement. Since high levels of student engagement (involvement) have been found to be empirically associated with higher rates of student retention (Pascarella & Terenzini, 1991; Tinto, 1993; Astin, 1993), the strong relationship between level of student engagement and quality of academic advisement revealed in the latest NSSE research may be interpreted as providing additional evidence of an empirical link between academic advisement and student retention."

John Gardner (2003) as quoted by Joe Cuseo on the First-Year Assessment List FYA-LIST@listserv.SC.EDU, 02/05/03

18) "Effective advising is a part of successful retention programs."

19) "It is hard to imagine any academic support function that is more important to student success and institutional productivity than advising"
